

THE SEMMELWEIS SYSTEM CAN HELP YOU TO FIGHT COVID-19

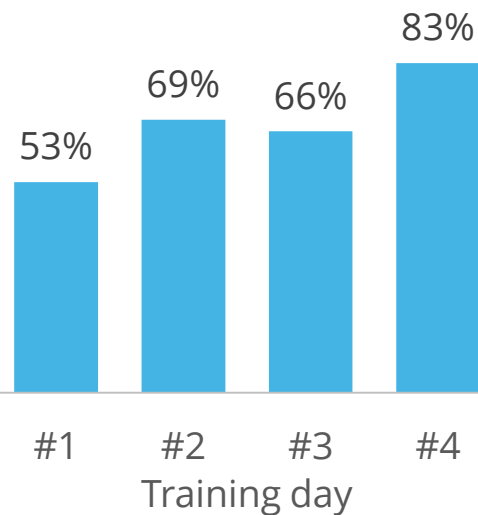

COVID-19 infection most easily transmits in hospitals and healthcare settings

Proper hand hygiene is the key to prevent the spread of the virus

Percentage of successful hand hygiene events

* Result of 32 voluntary participants.

Semmelweis System was introduced to the wards to improve their hand hygiene

A hand hygiene event was accepted if more than 98% of hand surface was covered by the alcohol-based handrub

HAND HYGIENE TECHNIQUE WAS SIGNIFICANTLY IMPROVED THANKS TO THE IMMEDIATE, VISUAL FEEDBACK OF THE SEMMELWEIS SYSTEM
